Cart Route System

In an attempt to maximize efficiency and fairness, effective June 2005, the Courtesy Carts began running on a route system. Instead of students always having to call for rides, the carts follow a set route on campus, picking people up at designated stops. Students desiring a pick-up at any other point along the route should wave their goldenrod card to get the driver’s attention. If a pick-up is needed at a location that is not on the route or if a student needs the wheelchair accessible cart, the student must call the Supportive Services office at 395-4334, or ask a nearby staff member to call for them. For such pick-ups, the Supportive Services Office will call the cart driver on the walkie-talkie and ask the cart to break away from the route at the most convenient spot, make the special pick-up, and return to the route as soon as possible. Maps showing the location of all the stops are available on the cart for you to give to students. If someone has questions or concerns, those should be addressed to the Office Supervisor.
