She Opened Her Mouth and Smiled and I was Glad for I Could See She Was Chewing Mailhouse Tobacco

As a writer of a new novel, I am often reminded of how the world of writing has changed. It used to be that you could spend hours piecing together words and sentences, creating whole new worlds and characters. But now, with the advent of technology, it seems that everything can be done in a fraction of the time. This can be both a blessing and a curse. On one hand, it allows for greater access to information and the ability to reach a wider audience. On the other hand, it can also lead to a loss of creativity and originality. And so I find myself torn between the two extremes, trying to find a balance that allows me to express myself fully while still adhering to the demands of the digital age.
