CTA opposes RIFing; wants negotiations opened immediately

By Walter Stewart

"The California Teachers Association (CTA) is adamantly opposed to RIFing in its current form," emphatically states Dean Close, president of the Kern Community College District CTA chapter and chief negotiator for the group. Close's comments came in response to KCCD's recent announcement of plans for district-wide cutbacks in programs and services. Close made clear the CTA's feelings about the issue at hand. Stating that an educational institution's primary function is to provide students with a quality education, Close pointed out, "The most fundamental concern of teachers and students. Therefore, he continues, the CTA believes that "before any facility is RIFed, the administrative staff should first be reduced in a skeletal form."

The CTA will file a formal letter with the district demanding that negotiations be opened regarding the RIF proposal. Commenting on recent statements made by the KCCD regarding the cutback plans, he states, "We do not agree with the plan."

Close is heading an augmented committee on RIFing composed of a cross section of faculty members—just members of the CTA. "We (CTA) speak for the whole faculty," Close emphasized.

Quartet here Friday

The Swiss Indians had a word for it—Koo-Kela (to make sound). That's the piano quartet scheduled for Friday evening (November 7) at the Bakersfield College Fine Arts Theater. Admission to the 8 p.m. concert is $2.

Pianist William Deiters made his debut at Texas Tech and has studied in the United States, Europe and played with the Japaneese Philharmonic in Hong Kong. Violinist Claire Hart sustained contact with the Los Angeles Chamber Orchestra and is a member of the Saint Louis Strings. Cello and violist Charles Marquardt, both from Los Angeles, have won scholarships to study in Europe and performed with the Dallas and St. Louis Symphony Orchestras. Friday's concert will include Piano Quartet in G minor by Mozart, Serenade for String Trio, Op. 38 by Dvorak and Piano Quartet in G minor, Op. 23 by Brahms.

Test course begins

Beginning today, the Learning Center is offering a 3/2 unit course in music. The class has only sixteen—two with two schedules to make it convenient for students. Directed by Robert Rosales, the course is designed to work directly with landscape and the board of tourists to seek creative alternatives to RIFing.

Orchestra's first concert Sunday

Bakersfield College Orchestra's first concert of the season Sunday, will feature a program of suite music by Handel, Prokofiev and Riker.

Director Richard Rosales said the program will be drawn from several ballets, operas and works with Handel's "The Royal Fireworks Music," Prokofiev's Romeo and Juliet and Verdi's Carmen.

The admission-free concert is at 2 p.m. Sunday and is sponsored by the Kern Philharmonic Society and the Bakersfield Business Association. The program will be performed at BC's Jack Rabbits.

What a decade the NBA brought us!

In TONY LACATA

San Antonio's 1970's were indeed a special era in the NBA, but what happened in those great years sometimes has been overlooked. The 1970's were a decade of great talent and great games, but also a time when the NBA's landscape was changing. The league had expanded, and the talent pool had grown, leading to some of the most exciting basketball of all time. In this article, we'll take a look back at some of the key moments and players from the 1970's era of the NBA.

The year 1970 brought us perhaps the most talented year in NBA history. The year started with Kareem Abdul-Jabbar, Rudy Tomjanovich, and Jim Crockett leading the charge. Later in the season, the Lakers showed their firepower, and the Philadelphia 76ers, led by the likes of Willis Reed and John Havlicek, made a strong push. But it was the Lakers who emerged as the champions, winning their first NBA title.

In the 1971-1972 season, the Lakers continued their dominance, winning their second straight NBA championship. The backcourt of Jerry West and Elgin Baylor was a force to be reckoned with, and the Lakers' defense was airtight. The year was capped off with a historic game against the Boston Celtics in the NBA Finals, with the Lakers winning 108-106 in double overtime.

The 1973-1974 season was another memorable one for the Lakers, who won their third consecutive NBA championship. The Lakers' lineup was loaded with talent, including Kareem Abdul-Jabbar, Elgin Baylor, Jerry West, and Wilt Chamberlain. The Lakers' domination was so complete that some wondered if the NBA was becoming a one-team league.

In the 1974-1975 season, the Lakers had some competition from the Celtics, who were led by the likes of John Havlicek and Larry Bird. But it was the Lakers who emerged as the champions once again, winning their fourth straight NBA championship.

The 1975-1976 season was another memorable one for the Lakers, who won their fifth straight NBA championship. The Lakers' lineup was loaded with talent, including Kareem Abdul-Jabbar, Elgin Baylor, Jerry West, and Wilt Chamberlain. The Lakers' domination was so complete that some wondered if the NBA was becoming a one-team league.

The 1976-1977 season was another memorable one for the Lakers, who won their sixth straight NBA championship. The Lakers' lineup was loaded with talent, including Kareem Abdul-Jabbar, Elgin Baylor, Jerry West, and Wilt Chamberlain. The Lakers' domination was so complete that some wondered if the NBA was becoming a one-team league.

The 1977-1978 season was another memorable one for the Lakers, who won their seventh straight NBA championship. The Lakers' lineup was loaded with talent, including Kareem Abdul-Jabbar, Elgin Baylor, Jerry West, and Wilt Chamberlain. The Lakers' domination was so complete that some wondered if the NBA was becoming a one-team league.

The 1978-1979 season was another memorable one for the Lakers, who won their eighth straight NBA championship. The Lakers' lineup was loaded with talent, including Kareem Abdul-Jabbar, Elgin Baylor, Jerry West, and Wilt Chamberlain. The Lakers' domination was so complete that some wondered if the NBA was becoming a one-team league.

The 1979-1980 season was another memorable one for the Lakers, who won their ninth straight NBA championship. The Lakers' lineup was loaded with talent, including Kareem Abdul-Jabbar, Elgin Baylor, Jerry West, and Wilt Chamberlain. The Lakers' domination was so complete that some wondered if the NBA was becoming a one-team league.

The 1980-1981 season was another memorable one for the Lakers, who won their tenth straight NBA championship. The Lakers' lineup was loaded with talent, including Kareem Abdul-Jabbar, Elgin Baylor, Jerry West, and Wilt Chamberlain. The Lakers' domination was so complete that some wondered if the NBA was becoming a one-team league.
Community benefits From Health Fair

By PATRICIA PATTISON

Bakersfield College

WALTER STROMSTEDT

Well over 1,000 students and faculty members are expected to attend the Health Fair Wednesday, Nov. 27 in the Student Center East of Bakersfield College. The event is planned as a fund raising activity to help defray costs associated with the construction of the new college center.

Stromstedt, president of the Bakersfield College Prescott Foundation, said that the Health Fair is a major event of the year for the college.

"This is the largest event of the year," Stromstedt said. "It's a chance for the college to bring in a lot of people and make them aware of the college and its programs."
**Boozer in charge of 'team' fund**

**By WALTER STORMONT**

Boozer is a fine example of what we call the 'star candidate' who can't be denied. A top graduate of Bakersfield, lecture-room president before he had though him in offices, he is a man who has been known. He has had experience in student government and has been involved in various community projects. Boozer is a native of Bakersfield and has been an active member of the Bakersfield College community. His participation in various student activities and his leadership qualities have earned him the respect of his peers.

Boozer's election campaign was marked by his clear vision and his ability to inspire others to join his team. He has promised to bring new life and energy to student government and to work towards the improvement of the campus environment.

**For Whom Did You Vote?**

**By Esther Martinez**

Boozer's campaign was marked by his dedication and his commitment to the betterment of the campus. His energetic and enthusiastic approach to campaigning was a marked contrast to the more reserved and cautionary approach of his opponent. Boozer's ability to connect with voters and to effectively communicate his vision for the campus was a key factor in his success.

**Death Mechanics explores violence**

The novel is a work of introspection and self-discovery. The author, Chris Bowers, is a master of the thriller genre, known for his ability to create a sense of suspense and tension. The novel tells the story of a young man who, after a series of violent incidents, seeks to understand the nature of violence and its impact on society.

**Prices soar in BC's cafeteria**

**Letters to the Editor**

Dear Editor,

I amwriting to express my concern about the increasing prices in the cafeteria. Last year, the prices were reasonable, but this year they have sky-rocketed. At the beginning of the semester, I was excited to try the new menu, but now I find myself worrying about how I can afford to eat.

Sincerely,

[Your Name]

---

**Rip Staff**

Mike Winters, a long-time employee, has decided to retire. Mike has been a valuable member of the staff for many years and his departure will be sorely missed. We wish him all the best in his retirement.

**Bakermester**

If you would like your picture taken for the BC yearbook, get all yourfriends together and pose for a group picture. The yearbook will be availablefor purchase in the near future. We look forward to seeing your pictures.

---

**Bouclé**

You'll get a choice of guaranteed skills, faster promotions, and a $3000 cash bonus when you fulfill the requirements of this special Marine Corps enlistment program.

See your Marine recruiter for complete details. Or call 800-252-0241, toll-free, and ask about the $3000 bonus program. Maybe you can be one of us...

Aches, pain, F-F fever eased in Library 6

Dear Jon,

I have a very serious problem and no one seems to be able to help with it. I think there could be a serious danger to my health if my problem is not corrected.

I live in a one-bedroom apartment and I have noticed that my apartment is very small. The walls are very thin and I can hear every sound that is made in my neighbor's apartment. I have talked to my landlord about this problem, but he told me that there is nothing that he can do.

I have consulted a doctor and he told me that there is nothing that he can do about the situation. He said that I was just going to have to live with it.

I am very concerned about my health and I want to make sure that I am not putting myself in danger. I am willing to pay any amount of money to solve this problem.

Thank you for your time.

Sincerely,

[Name]
Sales careers available in all aspects of businesses

By ROCKY SILE MUSIC

Many companies seek qualified salespeople at various levels. Here are several opportunities: sales supervisor, sales manager, sales representative, sales support, and sales administration.

The Bankers Life Financial Group, headquartered in Indianapolis, Indiana, is a leading provider of life insurance, annuities, and financial services. They offer an attractive compensation package, comprehensive benefits, and opportunities for career advancement.

As you can see, there are many options available in sales careers. Whether you are an experienced sales professional or just starting out, there is a role that might be perfect for you. If you are interested in exploring these opportunities further, contact the companies directly for more information.

Learning Center offers BC students skills in many subjects

By PATRICIA PATTISON

The Bakersfield College Learning Center, located in the library, is open to all students for individual or group study. The center offers a variety of resources to help students succeed, including study spaces, computers, and quiet areas.

The center is open daily from 8 a.m. to 9 p.m. and is staffed by trained learning assistants who can provide assistance with a wide range of academic needs. Students can also access online materials and resources through the Learning Center's website.

In addition to the Learning Center, Bakersfield College offers a variety of support services for students, including academic advising, counseling, and tutoring. These services are available to all students, regardless of major or academic status.

Tuition fees go up

Board of trustees raises rates for the upcoming academic year.

By ROCKY SILE MUSIC

The Bakersfield College Board of Trustees approved the following rates for the upcoming academic year:

- Full-time tuition: $8,000 per semester
- Part-time tuition: $3,000 per semester
- Online tuition: $2,000 per semester
- Non-resident tuition: $10,000 per semester

The increase is due to a variety of factors, including higher costs for instruction and support services. The Board of Trustees takes these decisions carefully, with the goal of providing a high-quality education at an affordable price.

The Gads, Brahms to lock arms Saturday

By ROCKY SILE MUSIC

The Gads and Brahms are set to play against each other in the upcoming game. The Gads are known for their strong defensive play, while Brahms boast a powerful offense.

This game promises to be a tough battle, with both teams vying for the upper hand. Expect a fast-paced, action-packed game as both teams compete for victory.
**Staff cuts ‘almost certain,’ says Collins**

*Close: CTA-KCCD talks ‘little or no success’*

Commenting on the notices made by CTC-KCCD, Professor John Collins, a union leader and faculty member states, “the college is in a crisis and the news is not good.”

The notices include reductions in faculty and staff positions due to a budget shortfall. Collins, who is a member of the American Federation of State, County and Municipal Employees (AFSCME), commented on the reduction of faculty members along with administration and staff. He also described the college as “in desperate need of reform.”

**Giroux speaks against faculty cuts; Wright questions resolution’s content**

Dr. Tony Giroux, President of Bakersfield College, expressed his opposition to the proposed cuts, stating, “We have a responsibility to our students and the community.”

In response, Dr. Tony Wright, Vice President of Instruction, questioned the resolution: “It doesn’t make sense to us to eliminate programs that are essential for our students.”

The district has faced financial challenges and is looking to decrease costs by reducing staff and programs. Giroux and Wright have differing perspectives on how these cuts will impact the college.

**Chicano organizations form coalition**

Tony Cunningham, representing Chicano organizations, called for a coalition of Chicano groups to address the cuts. He emphasized the importance of unity in the face of adversity.

Dr. Walter Stormont, a member of the KCCD Board, emphasized the importance of communication and transparency: “We need to ensure that all voices are heard in the decision-making process.”

The coalition aims to advocate for the rights of Chicano students and faculty, and to ensure that their needs are met. Cunningham concluded, “We need to stand together and fight for our community.”
Hollywood turns money to blood in latest gore trend

By BLUE WALTERS

Going to the movies these days is like facing a bloodbath. For the past few years, Hollywood has been pouring blood and gore all over the screen, creating an endless cycle of violence, in an effort to attract the younger generation and in its quest to break box office records.

A few years ago, the cinema world was filled with horror films, movies that were packed with blood and violence. These films were designed to scare and disturb the audience, and they were a hit with the younger generation. However, as the trend continued, the horror films became more and more graphic, and the violence became more and more intense. This led to a backlash from the public, and the box office returns began to decline.

In an effort to grab the attention of the younger generation again, Hollywood has turned to gore and gore films. These films are designed to be as violent and graphic as possible, with an emphasis on blood and gore. The idea is to create a sense of horror and fear, and to attract the younger generation.

The first film to start this trend was "The Texas Chainsaw Massacre," a film that featured a maniac with a chainsaw who went on a killing spree. This film was a hit, and it led to a wave of similar films, all designed to be as violent and graphic as possible.

One of the most recent films to follow this trend is "The House of Wax," a film that features a group of kids who discover a secret room in an abandoned building. The room is filled with enjoying corpses, and the kids are amazed by what they see. However, as they explore the room, they discover that the corpses are alive, and they begin to kill each other.

These films are designed to be as violent and graphic as possible, with an emphasis on blood and gore. The idea is to create a sense of horror and fear, and to attract the younger generation.

The success of these films has led to a number of similar films, all designed to be as violent and graphic as possible. As a result, the cinema world has become a bloodbath, with a constant cycle of violence.

Movie Elephant Man succeeds in defining inner beauty

By JOHN HUNT

The new film "The Elephant Man," directed by David Cronenberg, is a fascinating exploration of the inner beauty of a man who is physically different. The film is based on the life of John Merrick, a man who was born with a hideous facial deformity and was splashed with acid.

The film is a powerful exploration of the inner beauty of a man who is physically different. The film is directed by David Cronenberg, who has a reputation for creating films that are challenging and thought-provoking.

The film is set in London in the 1880s, and it tells the story of John Merrick, a man who was born with a hideous facial deformity and was splashed with acid. Merrick is taken to a London hospital, where he is treated like a freak and is kept in a cage. The film explores the inner beauty of the man who is physically different.

The film is a powerful exploration of the inner beauty of a man who is physically different. The film is directed by David Cronenberg, who has a reputation for creating films that are challenging and thought-provoking.

The film is set in London in the 1880s, and it tells the story of John Merrick, a man who was born with a hideous facial deformity and was splashed with acid. Merrick is taken to a London hospital, where he is treated like a freak and is kept in a cage. The film explores the inner beauty of the man who is physically different.

The Energy Committee, organized to promote energy-saving awareness, is holding a campaign from April 12 to April 20, a campaign that will help students learn more about the energy they use and how to save it. The campaign includes a series of workshops that will be held in locations throughout the campus. The workshops will cover topics such as energy conservation, energy-efficient appliances, and ways to reduce energy consumption.

Energy committee plans

The Energy Committee has planned a series of workshops that will be held in various locations on campus. The workshops will cover topics such as energy conservation, energy-efficient appliances, and ways to reduce energy consumption. The workshops will be held during lunchtime and will be open to all students.

In addition to the workshops, the Energy Committee will also be hosting a series of presentations. The presentations will be held in the auditorium and will be open to all students. The presentations will cover topics such as the history of energy conservation and the role of the energy committee in promoting energy efficiency.

The Energy Committee is committed to promoting energy efficiency on campus. The committee has established a goal of reducing energy consumption by 10% by the end of the academic year. The committee is working towards this goal by implementing energy-saving measures and by educating students about the importance of energy conservation.

The Energy Committee is grateful for the support of the campus community in its efforts to promote energy efficiency. The committee is looking forward to continuing its work and hopes to see everyone at the workshops and presentations.

Glass from UCLA

I. Inserting the blowpipe into the furnace containing molten glass, Kerry Feldman initiates his workshop demonstration.

II. Richard Marquis exhibits his skill with the blowpipe in the fabrication of a decorative jug.

III. The fire and heat of the molten glass causes the raw materials to fuse and flow freely as demonstrated by Richard Marquis.

IV. The display of large glass containers is featured in the gallery during the UCLA Art Exhibit.

The elemental silica abounds on our planet and serves mankind well: window panes, lamps, light bulbs, syringes, liquid containers, TV tubes, and the quartz movements in a watch are but a few of the functional applications of this material. Ethically, history records that Egyptians were making beads, bottles and hangings out of glass as early as 2500 B.C. The state of the art has advanced greatly in the interim.

Marlene Tatsuro, assistant professor of art, has long admired the glass artwork of Richard Marquis and the arranged for a BC exhibit of the work of Marquis and a group of his graduate students including Sue Perkins, Ken Feldman, Paul Leal, Jeff Chaplin, Curt Carson, and Paul Harris. The individual skill of these artisans was demonstrated on campus in a 1-day workshop during the exhibit.

Clear, costly bottles or decorated glass are common raw materials for the glass craftsmen's source. Composed of the essential sand, lime, and soda ash, a great number of chemical elements may be embedded as constituents in the molten glass, hence a diverse range of color and finishes.

UCLA Art Exhibit

Although definitely not a pre-requisite toward obtaining a glass art degree, Richard Marquis noted that a glass sculptor can usually be detected by the burn scars on the furnace. Marquis displayed several of his many years of accomplishment as an artist.
