English, Reading, and Mathematics Classifications

Bakersfield College places students into courses with prerequisites on the basis of placement tests, previous school transcripts, and state requirements. If students have taken the college placement test or met with a counselor, the registration system will allow registration. Placement levels indicated in the first row of the chart are determined by your test scores and correspond to courses listed under the placement level. It is important to discuss program plans and high school courses with a BC counselor or advisor before registering.

Courses listed in boxes that are shaded are transfer level courses that are accepted for transfer to most four-year colleges and universities.

Course Classification System

Bakersfield College uses a course classification system that serves to describe the total educational program of the community college as required by Title 5, Section 55001. Classes currently mandated by the state are designated as: Liberal Arts and Sciences; Precollegiate-Discipline Specific; Precollegiate-Basic Skills; Occupational Education.

Course Numbering System and Transferability of Bakersfield College Courses

Transfer courses in the Bakersfield College curriculum are *generally* numbered 1 through 49. For information about the transferability of a specific course, please see the course description. Associate Degree only courses are for the primary purpose of meeting requirements for an Associate in Arts Degree or an Associate in Science Degree and certificate programs. These courses are designated Not Transferable. Each course is listed in one of the following categories:

Not Transferable: Not degree applicable

Not Transferable: Associate Degree only

*California State University (CSU) and private colleges
University of California System (UC), CSU and private colleges*

Many of the courses listed in this catalog are articulated with specific courses at four-year colleges and universities. This means that those colleges and universities will accept the corresponding Bakersfield College course as equivalent to the course they offer.

In some cases Bakersfield College offers courses that are taught at the baccalaureate level but do not have a lower-division equivalent at one of the four-year schools to which BC students commonly transfer. Sometimes these courses are technical in nature and might even be offered in the upper division or graduate level at four-year schools. These courses

are transferable but not articulated. They will be accepted for elective baccalaureate credit but do not satisfy a specific course equivalent.

ASSIST.org is the official repository of articulation for California's colleges and universities. Visit www.ASSIST.org to see which Bakersfield College courses are articulated.

Variable Topics Courses and UC Transferability

Variable topics courses are also called "Independent Studies," "Special Studies," "Special Topics," "Internships," etc. UC credit for variable topics courses is given only after a review of the course outline by the enrolling UC campus. This usually occurs after transfer and may include recommendations from faculty. UC credit is not given for variable topics courses in Journalism, Photography, Health, Business Administration, Architecture, Administration of Justice (Criminology) or Library Departments due to credit restrictions in those areas.
