Associate Degrees for Transfer

California Community Colleges are now offering associate degrees for transfer to the CSU. These may include Associate in Arts (AA-T) or Associate in Science (AS-T) degrees. These degrees are designed to provide a clear pathway to a CSU major and baccalaureate degree. California Community College students who are awarded an AA-T or AS-T degree are guaranteed admission with junior standing somewhere in the CSU system and given priority admission consideration to their local CSU campus or to a program that is deemed similar to their community college major. This priority does not guarantee admission to specific majors or campuses.

Students who have been awarded an AA-T or AS-T are able to complete their remaining requirements for the 120-unit baccalaureate degree within 60 semester or 90 quarter units.

To view the most current list of Bakersfield College Associate Degrees for Transfer and to find out which CSU campuses accept each degree, please go to <http://www.sb1440.org/Counseling.aspx>. Current and prospective community college students are encouraged to meet with a counselor to review their options for transfer and to develop an educational plan that best meets their goals and needs.

Bakersfield College currently offers three AA-T degrees in Communication Studies, Psychology, and Sociology, and more are under development.

The following is REQUIRED for all AA-T or AS-T degrees:

1. Minimum of 60 CSU-transferable semester units.
2. Minimum grade point average (GPA) of at least 2.0 in all CSU-transferable coursework. While a minimum of 2.0 is required for admission, some majors may require a higher GPA. Please consult with a counselor for more information.
3. Completion of a minimum of 18 semester units in an "AA-T" or "AS-T" major as detailed in the Program section of the catalog. All courses in the major must be completed with a grade of C or better or a "P" if the course is taken on a "pass-no pass" basis (title 5 § 55063). (Very few courses are pass-no pass basis for requirements in a major.)
4. Certified COMPLETION of the California State University General Education-Breadth pattern (CSU GE Breadth) OR the Intersegmental General Education Transfer Curriculum (IGETC) pattern.

AMERICAN SIGN LANGUAGE

Program Level Outcomes

- Demonstrate the ability to use and recognize specific language elements in the use of a language.
- Demonstrate an understanding of, and an ability to describe, the ways in which foreign languages reflect historical and cultural contexts.
- Transmit a comprehensive knowledge of the cultural heritage being studied.
- Differentiate and analyze an understanding of the diversity of human expression.

American Sign Language Associate in Arts Degree

Effective Fall 2009 all courses used for meeting the requirements for degrees must be completed with a grade of “C” or better.

The major in American Sign Language provides a linguistic and grammatical study of the language and an in-depth look into the culture of deaf people. The objective of the program is to provide students with a foundation for achieving fluency and the opportunity to transfer to a four-year institution.

With additional training, employment opportunities include interpreting, teaching and social service. If transferring to an institution other than UC or CSU, students should check with the receiving institution to ensure transferability of ASL courses as foreign language credit.

ANTHROPOLOGY

Program Learning Outcomes

Upon successful completion, the student will

- Demonstrate an understanding of the perspectives, theories, methods and core concepts of the behavioral sciences.
- Explain the major problems and issues in the disciplines in their contemporary, historical and geographical contexts.
- Demonstrate an understanding of and an ability to describe the contributions and perspectives of women, ethnic and other minorities and Western and non-Western peoples.

Anthropology Associate in Arts Degree

Effective Fall 2009 all courses used for meeting the requirements for degrees must be completed with a grade of “C” or better.

Anthropology is the scientific study of humanity, examining human biology and culture today and in the past, and biological and cultural change through time. Students with an Anthropology major concentrate in one of the following areas: cultural anthropology, biological/physical anthropology or archaeology. The major in anthropology prepares students for a variety of research/academic positions (e.g. museums, colleges and universities, zoos or government agencies); and non-academic/research positions (e.g. businesses, archaeological companies or professional writing). The objective of this program is to prepare students for transfer to a four-year university. Anthropology’s emphasis on research skills, organizational skills, critical thinking, technical writing, project management and use of holistic perspective make it an excellent undergraduate major for a variety of fields and graduate programs.

Career opportunities in Anthropology include teaching, government service, research, and law.

APPRENTICESHIP PROGRAMS

Program Learning Outcomes

Upon successful completion, the student will

- Successfully transition to the Journeyman level designation and certification, upon successful completion of requirements by the California Division of Apprenticeship Standards.
- Demonstrate measures used by trades in use of tools, techniques, hands-on skills, and competencies for practices in specific occupations.
- Identify and use equipment of specific trade in meeting standards for measurement and calibration.
- Read, and apply specific trade instructions and design for construction or production outcomes as required by the specific trade practices and standards.

Apprenticeship courses are designed for indentured apprentices under the Shelley-Maloney California Apprenticeship Standards Act. The Apprentice Agreement states that the student will supplement on-the-job training with related classroom instruction during each year of apprenticeship.

- Carpentry • Electricians
- Operating Engineers • Plumbers and Steamfitters
- Sheet Metal

Apprentice classes meet three to eight hours per week and yield two to six units of credit. Joint Apprenticeship Committees administering each program are composed of representation from labor, management, California State Division of Apprenticeship Standards, and Bakersfield College. These committees adopt state approved standards for operation and assure equal opportunity for applicants. Related training in apprenticeable occupations, in addition to those listed below, may be offered as the need arises.

Information for entry into apprenticeship programs may be obtained from the college coordinator of apprenticeship training. Interested persons are encouraged to apply for any of these programs and may contact the Bakersfield College Apprenticeship Department at 395-4408 for further information.

Apprenticeship Associate Degree Program

Effective Fall 2009 all courses used for meeting the requirements for degrees must be completed with a grade of “C” or better.

Apprenticeship classes for duration of apprentice period (45 units maximum) Units
12-45

Work Experience (four semesters, maximum of 16 units) 4-16

Related technical subjects as recommended by JAC 0-6

In addition, students must comply with the requirements as shown in the catalog under Graduation Requirements. The departmental counselor can assist the student in planning for the A.A. degree.

Apprenticeship Certificate of Achievement Programs

Apprenticeship classes for duration of apprentice period Units
12-45

Work Experience 16
4-16 Electives (as recommended by JAC) to reach 30 units total (if needed).

ARCHITECTURE

Program Learning Outcomes

Upon successful completion, the student will

- demonstrate proficiency in technical skills required for employment in the architecture industry.
- demonstrate problem solving skills used in architectural design.
- demonstrate a deep understanding of the core material required for transfer to a four year university architectural degree program or for certification in architecture.

Architectural CAD Job Skills Certificate

This certificate covers the principles of architectural CAD to include basic 2D and 3D AutoCAD application as well as BIM related software covering architectural practices including both residential and light commercial working

documents. Emphasis is also placed on architectural delineation using software.

Upon completion of the following courses with at least a “C” grade in each course, the student will be awarded an Architectural CAD Job Skills Certificate.

Industrial Technology, Automotive Option Associate in Science Degree

This degree prepares students to work as technicians in the automotive industry and provides them with a broad based general education as well as technical competency required for the industry. In addition to the general education requirements prescribed by the Board of Governors of the California Community Colleges and the Board of Trustees of the Kern Community College District, the student must successfully complete 32 units from the automotive courses listed below. From these classes the student should choose two major classes in a specialty area (Engine Overhaul, Tune-up, Suspension/Brakes and Automotive Transmissions & Gear Boxes) and make up the remainder of the 32 units from areas of choice. Career opportunities in automotive technology include automotive engine performance and emissions, engine overhaul, brakes and suspension, transmission and gear box overhaul.

Total Units: 32

Program Learning Outcomes

Upon successful completion, students will

- demonstrate proficiency using a microscope.
- Fourth semester Nursing students & second semester x-ray students will report biology prerequisite courses were important to their success thus far in the program.
- identify medical problems and apply appropriate and effective solutions.
- analyze a clinical situation using anatomical terminology, select the correct technology to use for further examination, analyze and determine a diagnosis when a pathology is described, create a plan of action
- Students who successfully completed the allied health pathway at BC will be accepted into the Nursing Program (defined as NURS B1) and further, those students will persist and complete the Nursing program (defined as NURS B9 and B10).

Biology Associate in Science Degree

Effective Fall 2009 all courses used for meeting the requirements for degrees must be completed with a grade of “C” or better.

Biology is the study and application of principles of cell biology, ecology, evolution, genetics, anatomy and physiology as it relates to humans and other organisms. Laboratory and field trip activities emphasize the integrated and interdependent nature of living systems. Course work trains students to use observation and investigation to identify questions and pursue answers using the scientific method.

Graduates with biology degrees may pursue jobs in a variety of fields including; biochemistry, biotechnology, botany, ecology, entomology, genetics, health, immunology, medicine, molecular biology, oceanography, pharmacy, teaching, wildlife management, zoology and related clinical fields. Biology majors may choose to specialize in research based on a particular organism or an aspect of biology related to those listed above. Career opportunities in Biology include many fields of biology, medical school, dental school and veterinary school.

Emphasis in General Biology

Biology Associate in Science Degree

Effective Fall 2009 all courses used for meeting the requirements for degrees must be completed with a grade of “C” or better.

Courses required for the Human Biology Associate of Science degree include biology and chemistry courses necessary for transfer to allied health programs such as nursing, physical therapy, Physician Assistant, and radiology. Please refer to the Suggested Program information and check with a counselor concerning specific degree requirements to specific programs and transfer institutions. Please note that many of the courses have prerequisites that are best taken in the appropriate order to ensure success.

Career opportunities in Biology include Nursing, physical therapy, medical technologist, and physician assistant.

Emphasis in Human Biology

Total Units: 18

Required Courses:

Course Number	Title	Units
BIOL B32	Human Anatomy & Physiology I	4.0
BIOL B33	Human Anatomy & Physiology II	4.0
BIOL B16	General Microbiology	5.0

Electives to equal at least 18 units:

Course Number	Title	Units
BIOL B21	Special Projects in Biology	1-2.0
BIOL B34	Pathophysiology	3.0
BIOL B255	Human Anatomy & Physiology Success Lab	0.5- 1.0

CHEM B1a	General Chemistry I	5.0
CHEM B1b	General Chemistry and Chemical Analysis	5.0
MEDS B60	Medical Terminology	3.0
NUTR B10	Elementary Nutrition	3.0

Note: Students transferring to a 4-year institution for a B.S. in Biology generally take the CHEM B1a, B1b sequence. Note: Students transferring for a B.S. in Nursing should consult the university of choice as to which chemistry sequence meets transfer needs.

Suggested Program for Biology Majors

This suggested program meets all Intersegmental General Education Transfer Curriculum (IGETC) requirements. This program is a series of courses that community college students can use to satisfy lower-division general-education requirements at any California State University (CSU) or University of California (UC) campus. It will permit a student to transfer to a campus of the CSU or the UC system without the need, after transfer, to take additional lower-division general-education courses to satisfy campus general education requirements. The program also meets or exceeds the minimum entrance requirements for most medical schools and other health professional programs. This program assumes you are academically prepared for university-level courses. Students requiring additional preparation in mathematics, reading or English will require at least one additional semester and should consult a counselor for advice.

Business Administration Associate in Arts Degree

Effective Fall 2009 all courses used for meeting the requirements for degrees must be completed with a grade of “C” or better.

The general purpose of the program in Business Administration at the university and state college is twofold. First, it is organized to help students to develop a broad understanding of our economy and our society in order to serve as a basis for responsible administrative and executive positions in business and government. Second, it offers the opportunity for students to acquire skills in specialized and professional types of employment.

Since requirements vary, the current catalog of the chosen college or university should be consulted for specific requirements of the School of Business Administration.

This suggested program will meet most of the lower division requirements at the California State colleges and universities as well as fulfilling the major requirements for the Associate in Arts Degree from Bakersfield College.

California Real Estate Certificate of Achievement

The Real Estate courses offered are recognized by the State of California and accepted as prerequisites for the students to sit for their licensing examinations. These courses are also available for continuing education credits. Upon completion of these courses, the students will have the knowledge to allow them to comply with real estate practice standards imposed by the Real Estate License Law and Commission rules for the State of California. Students have the option of completing certificate and/or two-year degree programs.

This certificate is approved by and operated in cooperation with the California Department of Real Estate and the California Association of Realtors. Upon completion of the following courses with at least a “C” grade in each course, a student will be awarded a Real Estate Certificate of Achievement.

Retail Management Certificate of Achievement

A Certificate of Achievement in Retail Management is designed to prepare students for entry-level employment. The Certificate will provide the student with broad-based knowledge and skills in retailing including grocery chains. This foundation can be built into many successful careers. The certificate is approved by members of the Western Association of Food Chains, all the major supermarket chains in the western 13 states. It encompasses several business essentials, including the “soft skills” of management and communication required for career success in the retail food industry. Upon completion of the following courses with at least a “C” grade in each course, a student will be awarded a Retail Management Certificate of Achievement.

CHEMISTRY

Program Learning Outcomes

Upon successful completion, the student will

- Demonstrate a knowledge of and recognize the processes that explain natural phenomena.
- Apply the methodologies of science when approaching a problem.
- Apply logical quantitative and qualitative reasoning in solving problems.

Chemistry Associate in Science Degree

Effective Fall 2009 all courses used for meeting the requirements for degrees must be completed with a grade of “C” or better.

The A.S. in chemistry is appropriate for students interested in transferring to a 4-year university as a major in the sciences. The major will provide students with a complete general education in math and core physical sciences as well as an introduction to some basic computer systems skills. Additionally, the degree provides the student employment opportunities within local industries as a laboratory technician.

Career opportunities in Chemistry for transfers, are varied and broad, ranging from all chemical industries, physics, all other areas of the physical sciences, engineering, and all areas of the biological sciences and allied health fields. Examples of local industries include: agriculture, geo and petrochemical businesses, analytical services and laboratories.

COMMUNICATION

Program Learning Outcomes

Upon successful completion, the student will

- Construct, use, and interpret messages across multiple channels to inform, persuade, manage, negotiate, relate, and generally influence each other within and across varying cultural venues.
- Identify and value disparate systems of social norms and values that influence the human communicative process.
- Understand the various theoretical and pragmatic skills that enable them to navigate social interaction within multiple interpersonal, small group, public, and intercultural contexts.
- Become familiar with both field-specific nomenclature as well as effective oral, listening, and critical thinking skills.

Associate in Arts in Communication Studies for Transfer

The Associate in Arts in Communication Studies for Transfer is intended for all students who plan to complete an AA in Communication studies. This degree is especially valuable for those students planning on completing a bachelor’s degree in Communication or a similar major at a CSU campus because the Associate in Arts in Communication Studies for Transfer guarantees admission to the CSU system (but not to a particular campus or major). In order to earn the Associate in Arts in Communication Studies for Transfer, students must complete a minimum of 60 required semester units of CSU-transferable coursework which includes the CSU General Education or IGETC requirements with a minimum GPA of 2.0. Students transferring to a CSU campus that does accept the Associate in Arts in Communication Studies for Transfer will be required to complete no more than 60 units after

transfer to earn a bachelor’s degree (unless the major is a designated “high-unit” major). This degree may not be the best option for students intending to transfer to a particular CSU campus or to university or college that is not part of the CSU system. Students should consult with a counselor when planning to complete the degree for more information on university admission and transfer requirements. No additional graduation requirements are required to complete this degree.

The Associate in Arts in Communication Studies for Transfer equips students with relational and presentation skills that provide a foundation for success throughout students’ educational careers, business careers and personal interactions. Students learn about verbal and nonverbal channels of communication that inform, persuade, manage, interpret, direct, or influence social interaction in diverse contexts. The degree introduces students to both established and contemporary theories of human communication pertaining to societal construction, maintenance, and perpetuation of acceptable patterns of communicative conduct. Students choosing this degree also acquire pragmatic communication skills enabling them to competently navigate social interaction within interpersonal, small group, public, organizational, and intercultural contexts. Students learn field-specific nomenclature as well as effective oral, listening, and critical thinking skills needed to successfully manage communication encounters in a variety of professional and personal environments. Students will be prepared in this lower division work for a baccalaureate degree in Communication Studies, Speech Communication, or a similar degree.

CONSTRUCTION

Program Learning Outcomes

- Upon successful completion, the student will
- demonstrate proficiency in technical skills and safety principles required for industrial employment.
 - demonstrate problem solving skills used in industrial design and product development.
 - demonstrate a deep understanding of the core material required for transfer to a four year university degree program or for certification in the department programs.

Construction Technology Certificate of Achievement

The requirements for the Construction Technology Certificate of Achievement are intended to provide students with the opportunity to develop skills and knowledge to enter into the diverse residential construction field. So each student can explore and design their respective career path, emphasis is placed on blending technical skill development, industrial safety with practical lab activities. Students can obtain these courses from within the Construction Technology area and from the various related disciplines (Architecture, Industrial Drawing, Industrial Technology and Wood Technology).

Industrial Technology, Construction Option Associate in Science Degree

Effective Fall 2009 all courses used for meeting the requirements for degrees must be completed with a grade of "C" or better.

The requirements for the Associate of Science Degree in Industrial Technology-Construction Technology option are intended to provide students with the opportunity to develop and blend the critical thinking skills along with the technical construction skills necessary to supervise or construct structures within the residential building profession. Course work within the construction program is designed to assist students in defining their respective career paths within the diverse and challenging construction profession. Course emphasis is placed on blending technical skill development, industrial safety with practical lab activities. Students can obtain these courses from within the Construction Technology area and from the various related disciplines (Architecture, Industrial Drawing, Industrial Technology and Wood Technology). To compliment the individual student's academic and technical growth, students complete required General Education courses. Students working toward this degree are also encouraged to apply for the Construction Technology Certificate of Achievement. Career opportunities include entry level construction trades, estimators, construction supervisors & managers, inspectors, construction educators and Class A, B & C licensed contractors.

CORRECTIONAL ADMINISTRATION

Program Learning Outcomes

- Upon successful completion, the student will
- identify, analyze, and apply the fundamental theories and concepts underlying the American Correctional system.
 - identify and describe the operational elements of the major components comprising the American Prison and Jail systems.
 - identify, analyze, and apply basic legal principles and rules to factual situations.
 - identify and implement the principles and procedures

- utilized in legitimate scientific and criminal investigation.
- demonstrate multicultural awareness and respect for constitutional and human rights.
- identify, analyze, and apply the ethical components of discretionary decision-making in probation, parole, and institutional corrections.
- demonstrate respect for the dignity and humanity of victims, perpetrators, and wrongfully convicted persons.
- demonstrate the ability to communicate effectively orally and in writing.

Correctional Administration Associate in Arts Degree

This program includes classes that will guide students toward careers in law enforcement, the courts and the law, and state, local, and private corrections. These courses have been endorsed by the Joint Apprenticeship Committee of the California Department of Corrections, California Youth Authority, and the California Correctional Peace Officers Association.

Effective Fall 2009 all courses used for meeting the requirements for degrees must be completed with a grade of "C" or better.

DIGITAL ARTS

Program Learning Outcomes

Upon successful completion, the student will

- demonstrate an understanding of the principles, elements, and language of art.
- demonstrate the ability to critique their own work, as well as the work of other students; and defend their creative choices verbally.
- demonstrate an understanding of a portfolio or "body of work".

Digital Arts Certificate of Achievement

The program is designed to prepare students for entry level positions in various graphic art fields such as advertising,

graphic design, illustration, and digital imaging. The core learned disciplines are the principles of design, an understanding of the visual elements, exposure to art and design history, conceptual visual problem solving, and the production of a graphic portfolio using established computer graphic software. Upon completion of the following courses with at least a “C” grade in each course, a student will be awarded a Digital Arts Certificate of Achievement.

ECONOMICS

Program Learning Outcomes

Upon successful completion, the student will

- explain the nature and functioning of the market system.
- define criteria for assessing efficiency in the provision of goods and services.
- investigate and assess the operation of economic institutions.

- evaluate alternative policies intended to enhance economic outcomes.
- develop competence in quantitative methods and computing methods.

Economics Associate in Arts Degree

Effective Fall 2009 all courses used for meeting the requirements for degrees must be completed with a grade of “C” or better.

The major in economics is designed for students interested in preparing for advanced degrees in Economics, Business, Law and for those students concerned with the economic behavior of consumers, businesses, and governments. Economics majors have a wide variety of career opportunities in business, law, journalism, education, politics, finance and banking, government, public and private overseas service, and labor leadership. Many economics majors go on to pursue graduate study in a related professional area, such as law, business, or public administration.

ELECTRONICS TECHNOLOGY

Program Learning Outcomes

Upon successful completion, the student will

- demonstrate proficiency in technical skills and safety principles required for industrial employment.
- demonstrate a deep understanding of the core material required for transfer to a four year university degree program or for certification in the department programs.

Electronics Technology Certificate of Achievement

The Bakersfield College Electronics Certificate program will show the world that you have gained the necessary knowledge and skills to perform better on the job. This

program of study is widely recognized and modeled after local industry competency standards. A certified electronic professional often appears more dedicated, more skilled and thus more attractive to prospective employers. Program includes study in the following areas: Electrical theory and components, soldering, wiring diagrams, safety, advanced analog semiconductor and digital devices, power supplies, test equipment, programmable logic controllers, Allen Bradley SLC 500 and CLX 5000 Instrumentation, temperature, pressure, level detectors, radio communications, antenna and transmission lines, telecommunications, video, data, network technology, motor theory and wiring, computer integrated manufacturing, installation and wiring standards, and mechanical systems.

Career opportunities in Electronics Technology include entry level positions in petroleum/energy, manufacturing automation, instrumentation/process control, logistics and distribution, ancillary services, telecommunications, radio communications, food and materials processing, and industrial maintenance.

Industrial Technology, Electronics Option Associate in Science Degree

Effective Fall 2009 all courses used for meeting the requirements for degrees must be completed with a grade of "C" or better.

Technology runs the planet, with electronics playing an essential role. It is a digital world, and those who understand this world can become valuable additions to technology-focused employers. The Industrial Technology Degree, Electronics Option, teaches essential skills that can be put to use as an industrial technician, electronics technician, field service representative, salesperson or computer technician. A degree holding student will also be looked at for quick promotions into supervision and management positions.

EMERGENCY MEDICAL TECHNOLOGY

Program Learning Outcomes

Upon successful completion, the student will

- demonstrate the ability to comprehend, apply, and evaluate the clinical information relative to his/her role as an entry level EMT-1.
- demonstrate technical proficiency in all skills necessary to fulfill the role of the entry level EMT-1. Rates will be at 80% or greater (annually).
- demonstrate personal behaviors consistent with professional and employer expectations for the entry level EMT-1.

EMERGENCY MEDICAL TECHNICIAN-1 (EMT-1)

The Emergency Medical Technician-1 (EMT-1) course consists of 152 hours, which includes 24 hours of emergency room/ambulance experience. The course prepares the student to perform basic emergency care as part of a mobile emergency team. It also provides the student with an understanding of the skills and assessment techniques needed to care for an ill or injured person in the pre-hospital setting. Upon successful completion of the course, students are eligible to take an examination for certification as an Emergency Medical Technician 1. EMT-1's are employed by ambulance companies and some private industries to provide emergency care in case of illness or injury. The course is required for ambulance personnel, the California Highway Patrol and many other first care providers. Students may later choose to become paramedics.

ENROLLMENT

Enroll through the Bakersfield College Admission and Records Office. The course is offered each fall and spring two evenings per week for 16 weeks. This is a 7.5 unit course.

PRE-ADMISSION REQUIREMENT

1. Each student must possess a current American Heart Association BLS -Healthcare Provider card. (Bakersfield College offers a BLS course (MEDS B52).
2. Each student must be at least 18 years of age by the completion date of the course.
3. Mandatory physical examination/immunizations and fit testing must be completed 4 weeks after start of the course. Costs of meeting health requirements are paid by the student. Failure to meet these requirements will result in student ineligibility for clinical rotations.
4. Completion of the 3 unit Medical Terminology Course (MEDS B60) is strongly recommended.

CONDITIONAL ENROLLMENT

As a condition of enrollment in any Allied Health Program, students are required to submit to and pass a designated drug and alcohol screening, a background screening, and physical examination clearance (at the student’s expense). Please note the following:

- A history of felony conviction(s) or any bar, exclusion or other ineligibility for federal program participation could render a student ineligible for clinical placement, as determined by the clinical agencies.
- If a student cannot obtain background clearance from the clinical agencies, it will not be possible to place the student in the clinical areas, which is a required component of the program. In the event that a student cannot obtain a background clearance, the space will be forfeited. Students who are found to be ineligible for clinical placement by the clinical agency after admission to the program shall be subject to dismissal from the program, as they will be unable to complete mandatory clinical rotations.
- A physical examination completed by a physician of the student’s choice is required after acceptance to the Program to demonstrate that a student meets the technical standards necessary to meet the Program objectives. Appropriate immunizations and/or vaccinations and fit testing are also required and are performed at the student’s expense. More information can be found on the Allied Health web site at www2.bakersfieldcollege.edu/alliedhealth/ or in the Bakersfield College Allied Health Office, MS 178.

LICENSURE/CERTIFICATION ELIGIBILITY

Students with a misdemeanor and/or felony arrest conviction, either current or prior, may not receive certification or licensure from the State or County. Also, proof of citizenship (social security card and certified birth certificate) and fingerprinting are required by State certification/licensure agencies. Anyone who wishes clarification may contact the Kern County Emergency Medical Services Office at (661) 868-5200. Upon successful completion of the course, students will be eligible to sit for the National Registry EMT-Basic Examination (NREMT).

ACCREDITATION AND PROGRAM APPROVAL

Bakersfield College is accredited by the Western Association of Schools and Colleges. The Emergency Medical

Technician (EMT) Program is approved by Kern County Emergency Medical Services and meets all State and County requirements.

Emergency Medical Technician 1 (EMT-1) Job Skills Certificate

Total Units: 7.5

This certificate complies with state requirements and ensures that the student has met the local EMS (Kern County Authority) approval for county protocol training. It is also required for ambulance personnel and some other first care providers such as law enforcement and fire personnel. The certificate provides proof of successful completion of an approved EMT-1 program which is enforcement and fire personnel. The certificate provides proof of successful completion of an approved EMT-1 program which is necessary for the student to take the national licensure exam. Students must complete the required course with at least a “B” grade.

Career Opportunities in Emergency Medical Technology

Employment as an emergency medical technician with the fire department, hospitals, and a variety of healthcare settings statewide.

Total Units: 7.5

Required Course:

Course Number	Title	Units
EMTC B50	Emergency Medical Technician I	7.5

ENGINEERING

Program Learning Outcomes

Upon successful completion, the student will

- solve engineering related problems as related to student made projects and assignments.

Engineering Associate in Science Degree

Effective Fall 2009 all courses used for meeting the requirements for degrees must be completed with a grade of “C” or better.

People working in the field of engineering and related technical fields “bridge the gap” between scientific principles and the application of these principles to the needs of society. The field is quite diversified with exciting job opportunities for people with varied mathematic, scientific, and technical skills.

An engineer uses experience and judgment, as well as advanced training in engineering, science, and mathematics to formulate ideas and designs, and to determine standards, specifications, work orders and schedules so that projects can be economically beneficial to mankind. A Bachelor of Science Degree in Engineering is required. Many engineers earn Master’s or Doctor’s degrees.

Total Units: 47

Required Courses:

Engineering Technology Associate in Science Degree

Effective Fall 2009 all courses used for meeting the requirements for degrees must be completed with a grade of "C" or better.

Cal Poly Pomona; California State University, Sacramento; California State University, Long Beach Engineering technologists and engineering technicians are members of a technical team that also includes scientists, engineers and craftsmen. The members of the technical team perform job functions that are complementary and sometimes overlapping. By virtue of their education, training and interests, engineering technologists and engineering technicians are usually differentiated as follows: An engineering technologist uses applied and basic training in mathematics, science, and engineering classes, engineering methods learned through classes and experience, and developed technical (hands-on) skills in direct support of engineering activities. A Bachelor of Science degree in Engineering Technology is required. An engineering technician operates in a support role to aid in design, production, manufacturing, operations, and maintenance.

Under professional direction, the engineering technician conducts tests, trouble shooting and analysis, and other similar projects, or carries out functions such as drafting, surveying, designing and technical sales. An Associate in Science degree or a Certificate of Engineering Technology is required.

Bakersfield College offers courses required for two years of engineering technology education. Completion of these courses, called the "engineering technology core" prepares students either for transfer to the colleges and universities offering bachelor's degrees in Engineering Technology, or for completion of an Associate in Science degree in Engineering Technology. A beginning engineering technology student should have completed high school mathematics through intermediate algebra or MATH BD at Bakersfield College, one year of high school drafting, and be eligible for ENGL B50.

The following courses are required to satisfy the engineering technology core and Associate in Science program:

Total Units: 40

Required Courses:

Course Number	Title	Units
**ENGR B47	Introduction to Engineering and Design	3.0
ENGR B45	Properties of Materials	3.0
ENGR B24	Engineering Graphics and Descriptive Geometry	2.0
INDR B10	Introduction to Industrial Drawing & Graphics	1.0

ENGR B19C/C++	Computer Programming for Science, Engineering and Technology (C)	3.0

* May be used to also fulfill general education requirements

**Meets student development requirement

In addition, seven or more units from the following approved programs and/or subject areas are to be selected. See counselor or advisor for specific courses. Electronics/Electrical Technology; Construction Technology; Manufacturing Processes Technology; Welding/Fabrication; Industrial Drawing and Graphics.

ENGLISH

Program Learning Outcomes

Upon successful completion, the student will

- Write logical and coherent expository and argumentative papers, essays, summaries, and paraphrases using correctly the standard conventions of written English.
- Demonstrate an understanding of and an ability to describe ways in which literature reflects historical, intellectual, and cultural contexts, as well as aesthetic tastes .
- Evaluate literature and expository and argumentative papers and essays through application of critical thinking techniques.

Studies in English provide preparation for the professions, government service, and politics. Career opportunities in English include teaching, journalism, publishing, advertising, and copywriting.

Students seeking an Associate Degree must take the writing course English B1a and may take a literature class to fulfill the humanities requirement. Students seeking a Baccalaureate Degree should take English B1a and may take English B1b and other literature courses to fulfill specific General Education requirements. Students planning to major in English should take English B1a and B1b and at least two of the following: English B5a, B5b, B20a, B20b, B30a, B30b. Students planning to transfer to the University of California should consider English B2. For specific

information, students should consult the catalog of the school to which they intend to transfer.

FIRE TECHNOLOGY

Program Learning Outcomes

Upon successful completion, the student will

- Identify minimum qualifications and entry-level skills for fire fighting hiring.
- Demonstrate the ability to analyze, appraise and evaluate fire and emergency incidents.
- Identify and comprehend laws, regulations, codes and standards that influence fire department operations and identify regulatory and advisory organizations that create and mandate them, especially in the areas of fire prevention, building codes and ordinances, and firefighter health and safety.
- Analyze the causes of fire, determine extinguishing agents and methods, differentiate the stages of the fire and fire development, and compare methods of heat transfer.
- Identify and describe the apparatus used in the fire service, and the equipment and maintenance of fire apparatus and equipment.
- Identify and describe common types of building construction and conditions associated with structural collapse and firefighter safety.
- Differentiate between fire detection and fire suppression systems. Student will design and diagram a wet and

dry fire protection system, and identify alarm system components and their operation.

Fire Technology Certificate of Achievement

This certificate was developed to assist students who desire to become a firefighter, or desire Fire Technology as a career. This certificate will aid existing firefighters in promoting/advancing through the ranks of engineer, captain, battalion chief, etc. The Bakersfield Fire Department requires an A.A./A.S. Degree before a captain can take the promotional exam for battalion chief. This course of study will transfer to a four-year institution.

Note: Fire B-1 is a prerequisite and must be completed before taking other core fire technology courses. Fire B-1 can be waived if the student has completed either academy (B-62 or B-63) and B-2 can be waived for students who have a minimum of two years continuous experience as a full-time paid firefighter. A G.P.A. of at least 2.0 is required in the fire technology program. Of the 30 units required, a minimum of 12 units must be completed at Bakersfield College.

Bakersfield College’s Regional Fire Technology Academy (RFTA) was authorized by the California Fire Service Training and Education System (CFSTES) in 1980, with programs of study leading to Certified Fire and Certified Fire Chief. RFTA sponsors many cooperative training programs with federal, state, and local fire protection agencies. Individuals may develop a program suitable to their career goals with the aid of a college counselor. Courses may lead to the achievement of specific career goals, immediate employment, an Associate Degree, or transfer credits that satisfy requirements for a Bachelor’s Degree in Fire Technology.

Wildland Fire Technology Associate in Science Degree

This degree is designed for people who desire to enter or enhance their career in a state or federal wildland

firefighting agency. The course material is linked with the National Multi-Agency Coordinating Group certification process. Students are given the opportunity to take several didactic and practical tests administered throughout the program to attain both state and national level wildland competencies. The core curriculum includes certification material to secure the basic wildland red card needed for employment in a wildland fire agency. Additional course work is designed to meet or exceed the National Fire Protection Association’s 1051 Standard on Wildland Fire Fighter Professional Qualifications. The elective material is designed to allow a student to obtain some degree of specialization that may tailor a student’s education to qualify for supervisor positions in a wildland organization. Students may be placed in paramilitary and physically demanding environments designed to introduce the student to the job tasks and skills required to operate in the wildland fire services. Career opportunities include the Forest Service and the Bureau of Land Management. Discharged military service personnel can use their military service time towards their career in the Forest Service or the BLM.

Effective Fall 2009 all courses used for meeting the requirements for degrees must be completed with a grade of “C” or better.

FOODS/NUTRITION

Program Learning Outcomes

Upon successful completion, the student will

- practice proper basic principles of food safety

- (sanitation) and their application to food service operations and procedures.
- practice the principles and methods of food preparation emphasizing use of standardized recipes, industry production standards, and development of work skills.
 - perform dining room service function using a variety of types of service and demonstrate and understanding of quality customer service.
 - maximize nutrient retention in food preparation and storage and application of nutritional principles in menu planning.
 - demonstrate basic baking principles and to apply fundamentals to the preparation of a variety of products.
 - Understand a supervisor's role and responsibilities in managing a food service operation.

Child Nutrition Management Certificate of Achievement

Program emphasizes quality food production, production records, nutrition standards and student service in child nutrition programs including public and private schools, child-care centers and day-care centers.

A Certificate of Achievement may be earned by students who satisfactorily complete 24 units from the courses listed below with a minimum grade of "C" in all required courses. A Sanitation Certificate such as Serv Safe or equivalent is required for this certificate.

Geology Associate in Science Degree

The major in geology is appropriate for interested students who desire to be employable within the local petroleum industry as a geo-tech or other analogous position, or are seeking a solid science background for a profession like teaching. The major is designed to provide students with a good general education in math and science, a well-rounded introduction to physical and historical geology, as well as an introduction to some basic engineering skills.

Students electing to transfer to a 4-year university for a major in geology should complete the pending AS-T degree requirements (Geology Associate in Science Transfer Degree--see the geology instructor for a list of additional course completions). The student will find www.assist.org to be a useful point of information as well. A transfer degree is being developed.

Effective Fall 2009 all courses used for meeting the requirements for degrees must be completed with a grade of “C” or better.

HISTORY**Program Learning Outcomes**

Upon successful completion, the student will

- analyze major forces, events, and people instrumental in shaping human history.
- examine past social-cultural value systems which have formed a basis for human beliefs and challenges to those beliefs.
- analyze the various racial, ethnic and social sub-groups which have played a role in the shaping of human history.
- evaluate historical evidence using both primary and secondary sources.

The major in history is designed for students interested in gaining an understanding of our political, economic and social past. The major is an important part of the liberal arts program and can serve as preparation for graduate study in education, law, business, government and journalism. Many employers value the writing and thinking skills acquired by History majors. The knowledge gained in history is fundamental for an understanding of many of the other fields of learning.

Bakersfield College offers a wide variety of history courses in addition to those listed below. The student should select courses according to his/her area of specialization as well as the requirements of the college to which he/she plans to transfer. The student should also consult his/her counselor and the appropriate four-year college catalogs in determining an appropriate minor, foreign language requirements, and other core requirements.

Program Learning Outcomes

Upon successful completion, the student will

- Demonstrate an understanding of the perspectives, theories, methods and core concepts of the behavioral sciences.
- Explain the major problems and issues in the disciplines in their contemporary, historical and geographical contexts.
- Demonstrate an understanding of an ability to describe the contributions and perspectives of women, ethnic and other minorities and Western and non-Western peoples.

Human Services Job Skills Certificate

The Human Service certificate emphasizes classroom instruction as well as hands-on-experience through interning with community Human Services agencies. The field of

Human Services is very broad. It is concerned with meeting human needs and improving the overall quality of people's lives. The field is interdisciplinary, meaning that knowledge from a variety of other fields of study is applied to the overall goal of helping people.

Upon completion of the following courses with at least a "C" grade in each course, the student will be awarded a Human Services Job Skills Certificate.

Total Units: 15

Required Courses:

Course Number	Title	Units
COMS B5	Introduction to Microsoft Office 2010	3.0
ENGL B50	Introduction to College Composition	4.0
HMSV B40	Introduction to Human Services	3.0
HMSV B5	Human Services Internship	2.0
SOCI B1	Introduction to Sociology	3.0

Human Services Associate in Arts Degree

Effective Fall 2009 all courses used for meeting the requirements for degrees must be completed with a grade of "C" or better.

The major in Human Services provides the student with an academic background for entry-level positions in various human services agencies. It also prepares the student for upper-division work in human services and other behavioral sciences. The field is interdisciplinary with the overall career goal of helping people.

INDUSTRIAL DRAWING

Program Learning Outcomes

Upon successful completion, the student will

- demonstrate proficiency in technical skills and safety principles required for industrial employment.
- demonstrate problem solving skills used in industrial design and product development.

- demonstrate a deep understanding of the core material required for transfer to a four year university degree program or for certification in the department programs.

AutoCAD Job Skills Certificate

This certificate covers the principles of industrial drawing/CAD with the emphasis on using the AutoCAD software package from basic 2D principles through 3D solid modeling to obtain graphic solutions, design refinements, modifications and delineations. Software customization is also emphasized. Career opportunities include drafter, CAD operator, engineering tech, CAD manager, and architecture CAD operator.

Upon completion of the following courses with at least a “C” grade in each course, the student will be awarded an AutoCAD Job Skills Certificate.

LIBERAL ARTS

Program Learning Outcomes

Please refer to the general education student learning outcomes in the Graduation and General Education section of catalog.

Liberal Arts Associate in Arts Degree

Effective Fall 2009 all courses used for meeting the requirements for degrees must be completed with a grade of "C" or better.

The Liberal Arts major at Bakersfield College is designed to provide students with the opportunity to earn an associate in arts degree in a broad area of study. The major is interdisciplinary and allows students to develop a variety of skills transferable to numerous occupations and fields of study. The major is intended to provide general knowledge and to develop the intellectual capacities, such as reasoning and judgment, as opposed to professional or vocational skills. This major is suitable for transfer students preparing

for upper division study in a variety of fields in the liberal arts and for those students undecided as to major or further study. Students may satisfy requirements for the Liberal Arts major by completing one of the two options listed below. With any option selected, students must also complete all graduation requirements for Bakersfield College including a total of 60 degree applicable units with an overall grade point average of 2.00.

Select one of the following options:

1. Option One.
 - a. Complete the Intersegmental General Education Transfer Curriculum (IGETC) with a "C" GPA.
 - b. Complete at least 18 units from recommended lower division major preparation for the major at the approved university of your choice with a "C" grade in each course.
 - c. UC transferable elective units, if needed, to total 60 units.

OR

2. Option Two.
 - a. Complete CSU General Education Breadth with a "C" GPA.
 - b. Complete at least 18 units from recommended lower division major preparation for the major at the approved university of your choice with a "C" grade in each course.
 - c. CSU transferable elective units, if needed, to total 60 units.

LIBERAL STUDIES

Liberal Studies Associate in Arts Degree

Effective Fall 2009 all courses used for meeting the requirements for degrees must be completed with a grade of "C" or better.

Courses listed are based on information available at the time of publication of this catalog for the Liberal Studies Major Credential Track at CSU Bakersfield and are intended for students who plan to obtain a multiple subjects teaching credential. Students are advised to see a counselor for the most current requirements for a Liberal Studies major at CSU Bakersfield. Students transferring to other colleges or universities are advised to consult the catalog of the school they plan to attend. This degree is articulated directly with CSU Bakersfield and may not be applicable to any other CSU.

MANUFACTURING/MACHINE TECHNOLOGY

Program Learning Outcomes

Upon successful completion, the student will

- demonstrate proficiency in technical skills and safety principles required for employment in the manufacturing industry.
- demonstrate problem solving skills used in manufacturing design and product development.
- demonstrate a deep understanding of the core material required for transfer to a four year university program or for certification in the manufacturing program.

Basic Machine Tool Operations-Lathe, Mill Job Skills Certificate

This certificate covers the principles of machine tool technology to include the use of precision measuring, drilling machines, saws, lathes and milling machines. Career opportunities include machinist.

Upon completion of the following courses with at least a “C” grade in each course, the student will be awarded a Basic Machine Tool Operations-Lathe, Mill Job Skills Certificate.

Total Units: 3

Required Courses:

Course Number	Title	Units

MATHEMATICS

Program Learning Outcomes

Upon successful completion, the student will

- Use mathematics to investigate, model, and solve a variety of real-world problems.
- Use a variety of problem-solving methods.
- Use mathematics to write and communicate in their discipline.
- View mathematics as a language to describe relationships and patterns. Demonstrate an understanding of concepts and skills needed for future mathematics courses or courses in related disciplines.
- Demonstrate a solid understanding of functions from multiple perspectives.
- Use numerical, graphical, symbolic, and verbal representations to solve problems and communicate with others.
- Use technology as a tool for exploring mathematical concepts.
- Demonstrate an ability to work with mathematical abstractions, analyze mathematical relationships, make plausible conjectures, and develop proofs.
- Synthesize their mathematical knowledge.

Effective Fall 2009 all courses used for meeting the requirements for degrees must be completed with a grade of "C" or better. This degree represents the standard freshman and sophomore level classes for a mathematics major. Career opportunities include teaching, actuarial, and statistics.

MUSIC

Program Learning Outcomes

Upon successful completion, the student will

- Demonstrate the ability to recognize, describe and/or effectively produce various components of music including elements of pitch and rhythm.
- Demonstrate an understanding and appreciation of the ways in which arts reflect historical, intellectual, and cultural contexts, as well as aesthetic tastes.
- Demonstrate through successful group or individual performance acquired musical skills and knowledge appropriate to lower-division major preparation.

Effective Fall 2009 all courses used for meeting the requirements for degrees must be completed with a grade of "C" or better.

Students who plan to major or minor in music should commit themselves to the highest possible level of proficiency in theory, piano, literature, group performance, and applied (individual) instruction in their performance area. Students should take the required courses in music and complete courses in general education for the transfer college of their choice. Elective courses will both enrich the student's background and balance weak areas of knowledge for later academic growth. Career opportunities in music include performer, conductor, composer, arranger, recording artist, recording engineer, critic, musicologist, theorist, private teacher, single-subject teacher, professor, copyist, church musician, music therapist, sound technician, tour manager, and agent.

NURSING

Includes Associate Degree Nursing Program (Registered Nursing), LVN-ADN Program, Vocational Nursing, Nurse Assistant

Associate Degree Nursing Program

Total Units: 41

Program Learning Outcomes

Upon successful completion, the student will

- Apply direct and indirect patient care services that ensure the safety, comfort, personal hygiene, and protection of patients; and the performance of disease prevention and restorative measures.
- Apply direct and indirect patient care services, including, but not limited to, the administration of medications and therapeutic agents, necessary to implement a treatment, disease prevention, or rehabilitative regimen ordered by and within the scope of licensure of a physician, dentist, podiatrist, or clinical psychologist, as defined by Section 1316.5 of the Health and Safety Code.
- Perform skin tests, immunization techniques, and the withdrawal of human blood from veins and arteries.
- Demonstrate understanding of how to observe for signs and symptoms of illness, reactions to treatment,

general behavior, or general physical condition, and (A) identify whether the signs, symptoms, reactions, behavior, or general appearance exhibit abnormal characteristics, and (B) implement, based on observed abnormalities, of appropriate reporting, or referral, or standardized procedures, or changes in treatment regimen in accordance with standardized procedures, or the initiation of emergency procedures. (BPC Chapter 16, Article 2, Section 2725)

- Formulate a nursing diagnosis through observation of the client's physical condition and behavior, and through interpretation of information obtained from the client and others, including the health team.
- Formulate a care plan, in collaboration with the client, which ensures that direct and indirect nursing care services provide for the client's safety, comfort, hygiene, and protection, and for disease prevention and restorative measures.
- (Perform skills essential to the kind of nursing action to be taken, explains the health treatment to the client and family and teaches the client and family how to care for the client's health needs.
- Demonstrate the ability to delegate tasks to subordinates based on the legal scopes of practice of the subordinates and on the preparation and capability needed in the tasks to be delegated, and effectively supervises nursing care being given by subordinates.
- Evaluate the effectiveness of the care plan through observation of the client's physical condition and behavior, signs and symptoms of illness, and reactions to treatment and through communication with the client and health team members, and modifies the plan as needed.
- Demonstrate the ability to act as the client's advocate, as circumstances require, by initiating action to improve health care or to change decisions or activities which are against the interests or wishes of the client, and by giving the client the opportunity to make informed decisions about health care before it is provided. (CCR Title 16, Article 4, Section 1443.5).

The study of nursing is the application of knowledge from the arts and sciences. The purpose of the Bakersfield College Associate Degree Program is to provide the foundation for students to become competent registered nurses. The ADN Program respects the individuality of students and recognizes that each student has different educational, experiential, cultural, spiritual, economic, and social backgrounds and a unique support system. The aim of the Program is to provide a positive, innovative learning model that fosters the development of critical thinking and problem solving skills so that the graduate nurse is equipped to deliver care to a culturally diverse population in a variety of healthcare settings.

Mission

The mission of the Bakersfield College Associate Degree Nursing Program is to prepare entry-level registered nurses

as providers and managers of care across the health/illness continuum and as members within the profession. Graduate nurses will collaborate with members of the health care team, be effective communicators, be politically aware, and demonstrate a commitment to life long learning.

Prerequisite Requirements

All prerequisites must be completed with a "C" grade or higher.

- ENGL B1A (Expository Composition), 4 units at Bakersfield College or equivalent course at another accredited college.
- MATH BD (Intermediate Algebra) or higher, 3 units at Bakersfield College or an equivalent course at another accredited college
- CHEM B11 (Introduction to General, organic and Biochemistry) or CHEM B2A (Introduction to General Chemistry) or CHEM B1A (General Chemistry) at Bakersfield College or an equivalent Chemistry course of 3-5 units from another accredited college.
- BIOL B16 (General Microbiology) 5 units at Bakersfield College or equivalent course at another accredited college.
- BIOL B32 (Anatomy & Physiology I) 4 units at Bakersfield College or equivalent course at another accredited college.
- BIOL B33 (Anatomy & Physiology II) 4 units at Bakersfield College or equivalent course at another accredited college.
- (Anatomy and Physiology requirement can also be met with Human Anatomy (min. of 4 units) AND Human Physiology (min. of 4 units) of equivalent courses from another accredited college.)

General Education

General education courses are required to graduate from Bakersfield College with an Associate Degree in Nursing. It is suggested that most of these courses be completed prior to beginning the Nursing Program.

- Social Science (3 units) – any course listed in Area D3 of the Bakersfield College General Education Pattern
- Arts, Literature, Philosophy, and Foreign Language (3 units) –any course as listed in Area C of the Bakersfield College General Education Pattern.
- COMM B1* or COMM B2*
- ANTHB2* or SOC B1*

PHILOSOPHY

Program Learning Outcomes

Upon successful completion, the student will

- Explicate and criticize philosophical arguments
- Explain major philosophical ideas
- Defend personal positions on important philosophical issues

A major in philosophy has always been and continues to be one of the strongest traditional liberal arts majors in higher education. Some students major in Philosophy as a precursor to graduate work and academic careers, teaching and doing research in Philosophy and Education. Philosophy's emphasis on critical thinking, theories of knowledge, value and reality, truth, rational argument and proof make it an excellent pre-professional undergraduate major (e.g., for law, theology, medicine, business, computer science) or

minor (e.g., for the natural, physical and social science and humanities majors).

Philosophy Associate in Arts Degree

Effective Fall 2009 all courses used for meeting the requirements for degrees must be completed with a grade of “C” or better.

PHYSICAL EDUCATION

Program Learning Outcomes

Upon successful completion, the student will

- Critically examine the development of the individual as an integrated physiological, psychological, spiritual, and social being.
- Demonstrate an understanding of the concepts and principles of physical fitness and specific sport skills
- Value physical activity and become a lifelong participant in physical activity
- Achieve a health-enhancing level of physical fitness; and perform the specific activity with an adequate degree of proficiency.

Physical Education Associate in Arts

Effective Fall 2009 all courses used for meeting the requirements for degrees must be completed with a grade of “C” or better.

A major in Physical Education will encourage students to perceive learning as the merging of cognitive, affective, social, and psychomotor domains. A major in Physical Education allows students to transfer to a four-year university/college and is a starting point for a variety of Graduate and Doctoral Degrees. A degree in Physical Education can lead to employment in a variety of teaching and coaching avenues along with athletics and recreation based jobs, including athletic training, physical therapy, adaptives, etc.

The major requirements for an Associate Degree in Physical Education may be satisfied by completing 23 units as outlined below.

PHYSICS

Program Learning Outcomes

Upon successful completion, the student will

- Demonstrate a knowledge of and recognize the processes that explain natural phenomena.

- Apply the methodologies of science when approaching a problem.
- Apply logical quantitative and qualitative reasoning in solving problems

Physics Associate in Science Degree

Effective Fall 2009 all courses used for meeting the requirements for degrees must be completed with a grade of “C” or better. The Associate in Science Degree in Physics is designed to prepare students to begin upper division course work in pursuit of a Bachelor’s Degree (or ultimately a graduate degree) in physics upon transfer to a four-year college or university. Earning this degree should allow the student to become acquainted with the basic knowledge of physics contained in a calculus-based introductory physics sequence and the mathematics that supports that level of competency. The student will demonstrate proficiency in communication, critical thinking, quantitative problem solving, and laboratory science skills. This degree represents a step in a path preparing students for careers in any of the many branches of physics, physics education, and other technical fields, such as some engineering disciplines in which physics is an integral part.

All Four-Year Colleges and Universities

Before planning a study list, the community college student should consult a counselor and study the catalog of the senior institution to which he/she intends to transfer.

The introductory courses in Physics (Physics B2a-B2b or B4a-B4c) and Chemistry (Chemistry B1a-B1b, B2a) are designed to provide a foundation and understanding of the laws and principles of the physical world (matter and energy). These courses should be completed early in a student’s academic program to insure greater success in subsequent courses.

POLITICAL SCIENCE

Program Learning Outcomes

Upon successful completion, the student will

- demonstrate their understanding of the relevance of state and local politics, determining and developing an objective appraisal of major trends in social, economic, and political life.
- evaluate the power relationships between legislative, executive and judicial branches of government.
- compare and contrast the factors that determine the emergence of republican or authoritarian systems of governance.
- evaluate the influence of conflict and cooperation in the international bargaining process.

Political Science Associate in Arts Degree

Effective Fall 2009 all courses used for meeting the requirements for degrees must be completed with a grade of “C” or better.

The majors in Political Science are designed for students interested in gaining an understanding of the structure and functions of governments. The majors are an important part of the liberal arts program and prepare students for further study and careers in education, law, business, government, international relations and journalism.

The student should select the major emphasis, and courses according to his/her area of specialization as well as the requirements of the college to which he/she plans to transfer. The student should also consult his/her counselor and the appropriate four-year college catalogs in determining an appropriate minor, foreign language requirements, and other requirements.

PRIMARY CARE ASSOCIATE (Physician’s Assistant)

Stanford University Medical Center administers a program to train individuals who function in association with physicians in the maintenance and delivery of primary health care to medically underserved communities.

Upon completion of the prerequisite pre-clinical program at Bakersfield College or other accredited institutions,

students admitted to the program have 15 months of clinical experience coordinated through Stanford University Medical Center. Students participate in didactic course work full-time for the first quarter (3 months) at Stanford Medical Center in Palo Alto, California. Then they complete an equivalent of five days of didactic instruction each month (12 months) thereafter. All clinical experience occurs in an office practice preceptorship. Contact Counseling Department for further information.

Prerequisites:

Minimum requirements for application and admission include:

1. United States citizen or permanent visa.
2. High School Diploma or equivalent.
3. A minimum of 18 months direct patient care experience.
4. Satisfactory completion of the following academic prerequisites or their equivalents.

General Education courses are required for the P.C.A. Program. It is recommended that an AA or AS degree at Bakersfield College be completed prior to applying to the program.

The student must have a preceptor site established in order to complete the clinical experiences necessary for the program. Some assistance may be available in locating a preceptor.

Upon successful completion of the P.C.A. program. The graduate will sit for a certifying examination administered by the National Commission on Certification of Physician’s Assistants. Passing this examination allows the Physician’s Assistant to perform direct patient services under the supervision of primary care physicians certified by the California Board of Medical Quality Assurance.

Pre-Clinical Program Requirements

A minimum grade of “C” must be attained in each of these courses. Only work from a regionally accredited college can be accepted.

Algebra - Elementary. One year of high school math or MATH BA at Bakersfield College.

Chemistry - Introductory. One year of high school chemistry or equivalent.

Cultural Anthropology or Sociology: ANTH B2, SOCI B1 at Bakersfield College, or another acceptable course.
 English Composition - Freshman level: ENGL B50 (formerly ENGL B1), ENGL B1a at Bakersfield College, or other acceptable course.

General Psychology - PSYC B1a at Bakersfield College or other acceptable course.

Microbiology with laboratory; BIOL B16 at Bakersfield College, or other acceptable course.

- *American History and Institutions. See Graduation and General Education Section of this catalog.
- *Computer Literacy - Two semester units. Must include experience at a terminal (COMS B2) at Bakersfield College, or other acceptable course.
- *Ethnic Studies - A course that reflects the experience of an American ethnic group.
- *Humanities - One course from List A and one course from List B. (A) Literature, Philosophy (not Logic), or Western Civilization. (B) Art Appreciation, Music Appreciation, or Theatre Arts Appreciation.
- *Physical Education - Four quarter courses or three semester courses.
- *Speech - Public Speaking or interpersonal communication: COMM B1 or COMM B2 at Bakersfield College, or other acceptable course.
- *These courses are required if candidate does not possess an A.A., A.S. or higher academic degree.

PSYCHOLOGY

Program Learning Outcomes

Upon successful completion, the student will

- Demonstrate an understanding of the perspectives, theories, methods and core concepts of the behavioral sciences.
- Explain the major problems and issues in the disciplines in their contemporary, historical and geographical contexts.
- Demonstrate an understanding of and an ability to describe the contributions and perspectives of women, ethnic and other minorities, and Western and non-Western peoples.

Associate in Arts in Psychology for Transfer

Effective Fall 2009 all courses used for meeting the requirements for degrees must be completed with a grade of “C” or better.

The Associate in Arts in Psychology for Transfer is intended for those transfer-directed students who plan to complete an AA in Psychology because it guarantees admission to the CSU system (but not to a particular campus or major). In order to earn the Associate in Arts in Psychology for Transfer, students must complete a minimum of 60 required semester units of CSU-transferable coursework which includes the CSU General Education or IGETC requirements with a minimum GPA of 2.0. Students transferring to a CSU campus that does accept the Associate in Arts in Psychology for Transfer will be required to complete no more than 60 units after transfer to earn a bachelor’s degree (unless the major is a designated “high-unit” major). This degree may not be the best option for students intending to transfer to a particular CSU campus or to university or college that is not part of the CSU system.

Students should consult with a counselor when planning to complete the degree for more information on university admission and transfer requirements. This degree eliminates the additional Bakersfield College graduation requirements.

The major in psychology provides a study of the behavior of individuals and groups. The four-year degree in this major contributes to the foundational knowledge for positions in research and teaching, counseling, and working in clinical settings.

RADIOLOGIC TECHNOLOGY

Program Learning Outcomes

- The Radiologic Technology Program will graduate entry-level radiographers.
- Students will competently perform radiographic positioning.

Radiologic Technology

Radiologic Technology is a health care profession whose practitioners work in hospitals, imaging centers, and private physicians’ offices. The radiologic technologist (radiographer) is a member of the health care team who works directly with the patient and the physician performing a wide variety of diagnostic x-ray procedures. The role of the graduate radiographer may be that of staff radiographer, special imaging radiographer, supervisor, administrator or educator, depending upon the level of education and experience obtained.

The Bakersfield College Associate in Science Degree Radiologic Technology Program provides concurrent didactic and clinical education. The program is 24 months in length (excluding prerequisite coursework) and begins each

year in June. Students should anticipate making a full time commitment to the program during the school year. Summer sessions are required and semester/terms may be scheduled beyond the regular college session dates. The Program is primarily scheduled during the day; however an evening clinical rotation will be completed during the second year of the program. Clinical education sites include hospitals and imaging centers located in Bakersfield, California and Delano, California. Students may be assigned to any clinical education center in any geographical location.

The program provides the theory, skill and experience necessary to apply for admission to the licensure exam administered by the American Registry of Radiologic Technologists (ARRT); and for certification from the State of California, Department of Public Health, Radiologic Health Branch, as a Certified Radiologic Technologist (CRT). The student is also eligible to write the State Fluoroscopy Permit exam. Students must earn a minimum grade of “C” in all radiography courses, have met the State mandated curriculum and clinical hours, met all clinical education competencies and earned the Associate in Science degree to be recommended for these examinations/certifications. For program information, brochure and enrollment application form, consult the following website at www2.bakersfieldcollege.edu/alliedhealth/

Radiologic Technology Program Mission, Goals and Outcomes

The mission of the Bakersfield College Radiologic Technology Program is to promote student success by providing quality instruction for graduates to competently practice radiography at the entry level. The Program goals and outcomes are; 1) Students will be clinically competent. 2) Students will critically think and problem solve. 3) Students will demonstrate effective communication skills. 4) Students will demonstrate professional growth and development. 5) The Program will graduate entry-level radiographers.

Radiologic Technology Program Prerequisite Requirements

All prerequisite coursework must be completed prior to applying for the Radiologic Technology Program. Students are strongly encouraged to complete prerequisite courses prior to enrolling in general education courses. This will improve a student’s opportunity to apply for program enrollment. The following prerequisite courses must be completed with a “C” grade or higher.

1. BIOL B18 (Essentials of Anatomy and Physiology)

OR

BIOL B32 (Human Anatomy and Physiology I) and

BIOL B33 (Human Anatomy and Physiology II)

OR

equivalent course(s) at another accredited college.

Note: BIOL B14 (Human Anatomy) and BIOL B15 (Human Physiology) were previously taught at Bakersfield College and they meet this requirement.

2. MATH BD (Intermediate Algebra-5 units) at Bakersfield College

OR

equivalent course at another accredited college. A higher level college math course will be accepted in lieu of this algebra requirement.

3. MEDS B60 (Medical Terminology - 3 units) at Bakersfield College or equivalent course at another accredited college.

4. ENGL B1a (Expository Composition - 4 units); or an equivalent course at another accredited college. This prerequisite must be met by all new and Wait List applicants effective February 2013.

5. Minimum cumulative grade point average of 2.7 with Math BD passed on the first attempt;

OR

A minimum cumulative grade point average of 2.9 with Math BD passed on the second attempt. Withdrawal grades count as an attempt. This prerequisite must be met by all new and Wait List applicants effective February 2013.

6. Graduation from high school or an equivalent education (GED).

Enrollment Procedures and Application Filing Period

Application forms and all required documents must be received by the Radiologic Technology Program Office during the application month of February. Late applications will not be accepted. The next application period for new applicants will be February 2013. Due to the large number of students on the current Program Wait List, new applications will not be accepted in 2012. Students currently on the Wait List must refer to #7 under Application Procedures for more information.

Application Procedures

1. Complete required prerequisite courses (see above).
2. Obtain application form from the Allied Health Department located in Room 178 of the Math-Science Building on the main campus; or by telephone at (661) 395-4284; or on the website at www2.bakersfieldcollege.edu/alliedhealth/.
3. Arrange for an official copy of your high school transcript to be mailed directly to the: Radiologic Technology Program, Bakersfield College, 1801 Panorama Drive, Bakersfield, California 93305. A copy of High School Equivalency (GED) is required if your high school transcript does not identify graduation. Note: You may also hand deliver this transcript providing the transcript is “official” and sealed.
4. If you are a Bakersfield College student with no college courses other than Bakersfield College courses: Provide the Program with an unofficial Bakersfield transcript from the college web site or

an unofficial transcript from the Admissions and Records Office.

5. If you have taken courses from any college other than Bakersfield College:
 - a. Apply for admission to Bakersfield College either in person or online at www.bakersfieldcollege.edu, click on Admissions and Records and follow the directions under "Enrolling".
 - b. Submit an official copy of your transcripts from your previous college to the Office of Admissions & Records and request an evaluation of your transcripts. This process requires the form "Request for Evaluation". You may obtain this form in the Office of Admissions & Records or on-line under Admissions & Records- "Other Forms." Note: This process can take up to 12-16 weeks. Once your transcripts have been evaluated and posted to your Bakersfield College transcript, the student must either print a copy of the Bakersfield College transcript from the website or request one from the Office of Admissions and Records. This evaluation must be completed and then submitted to the Program prior to the end of the Program enrollment filing period during the month of February. **It is the responsibility of the student to supply this information to the Program during the month of February prior to the end of the enrollment filing period.**
6. Late application materials will not be considered for the current application period. Applicants are responsible for ensuring that their application is complete. The program is NOT responsible for late materials or incomplete applications. The application must be thoroughly completed and signed to be considered for eligibility.
7. Students on the Wait List must reapply annually during the enrollment month of February. This is required every year to keep the applicant's file current. If the student does NOT reapply, the student will be removed from the Wait List. Applications will be accepted in February 2012 for current Wait List students only
8. Through 2012, if the Radiologic Technology Program has more applicants for enrollment than space available and the current Wait List will fill the next program class of students, priority is provided to residents of the Kern Community College District. This procedure will be eliminated for the 2013 enrollment period.

General Education Requirements

General education courses are required to graduate from the Bakersfield College Associate in Science Degree Radiologic Technology Program. It is suggested that these courses be completed prior to program enrollment. Refer to the Bakersfield College General Education and Graduation Requirements in this catalog for more specific information and requirements for the college (the list below does NOT identify all requirements). All students are encouraged to

regularly check the college requirements for graduation to ensure that AS degree requirements will be met at the end of the radiography program.

1. Student Development: It is recommended that students complete this component as they begin college coursework.
2. Computer Studies (3 units) - COMS B2 or COMS B5 or equivalent is necessary to meet Radiologic Technology Program completion.
3. Behavioral Science - Psychology B1a recommended
4. Arts, Literature, Philosophy and Foreign Language-Humanities - Philosophy B12 recommended.
5. Health Education - Students that successfully complete the Radiologic Technology Program are waived from the Health Education requirement for graduation.
6. An individual who has previously received an associate degree or higher must meet and earn the Associate in Science Degree requirements for the Radiologic Technology Program to meet eligibility requirements for certification and licensure.

Health Requirements and Screenings

1. A physical examination will be required after the students receive notification of enrollment into the program to demonstrate that a student meets the technical standards necessary to meet the objectives of the program. A copy of the Essential Technical Standards required for Radiologic Technologists may be obtained in the Allied Health Division Office located in the Math-Science building, room 178 or on the program website at www2.bakersfieldcollege.edu/alliedhealth.
2. As a condition of enrollment to the Radiologic Technology Program, all students are required to submit to and pass a designated drug and alcohol screen.
3. As a condition of enrollment in any Allied Health Program with a clinical component, students are required to submit to and pass a designated background check. Every student offered space in the program will be required to submit to a background screening as part of his or her clinical requirements for admission. Please note the following:
 - A history of felony conviction(s) or any bar, exclusion or other ineligibility for federal program participation could render a student ineligible for clinical placement, as determined by the clinical agencies.
 - If a student cannot obtain background clearance from the clinical agencies, it will not be possible to place the student in the clinical areas, which is a required component of the program.
 - In the event that a student cannot obtain a background clearance, the space will be forfeited.
 - Students who are found to be ineligible for clinical placement by the clinical agency after admission

to the radiography program shall be subject to dismissal from the program, as they will be unable to complete mandatory clinical rotations.

4. Immunizations/health tests are needed for acceptance in a clinical education center and to protect the health and welfare of the student and community. Immunizations may include, but not be limited to, rubella, varicella, Hepatitis B, and Tuberculosis screening and the seasonal flu vaccine is also required.
5. The medical exams, drug/alcohol screens, background screen, immunizations and tests are performed at the expense of the student.
6. The student must possess a current Basic Life Support/CPR (cardiopulmonary resuscitation) card by the American Health Association (Healthcare Provider card). This card must be provided at the start of the program and be kept valid during the entire 24-month program.

Program Supply Information

Students will be required to purchase uniforms, textbooks and selected equipment, provide transportation to off campus clinical education centers in Bakersfield, California and Delano, California and pay current college fees. Estimated costs for books, uniforms, fees and required equipment for the first year of the program are approximately \$1,200 to 1,400. Subsequent semesters require enrollment fees, supplies, books and course syllabi (approximately \$1,200). Additional expenses for the last semester of enrollment also include the program pin and application fees for national and state licensure/registration examinations (approximately \$450).

Licensure/Certification Eligibility

The American Registry of Radiologic Technologists (ARRT) requires review of any conviction, misdemeanor or felony, or a sanction by the Program regarding an academic honor code, or review of suspension or dismissal by a radiography program and review of licensure suspension, denial or other disciplinary action by a regulatory authority or certification board other than the ARRT. This review may be conducted prior to or during the program. For more information contact the ARRT at: 1225 Northland Drive, Mendota Heights, MN 55120, (651) 687-0048, or www.arrt.org. The State Department of Public Health, Radiologic Health Branch and the American Registry of Radiologic Technology requires possession of either a Social Security number or Tax payer ID number to apply for licensure and/or registration.

Accreditation

Bakersfield College is accredited by the Western Association of Schools and Colleges. The Radiologic Technology Program is accredited by the Joint Review Committee on Education in Radiologic Technology (JRCERT), 20 N. Wacker Drive, Suite 2850, Chicago, Illinois 60606-3182, (312) 704-5300 or www.jrcert.org. The program is also approved by the State of California, Department of Public Health, Radiologic Health Branch, P.O. Box 997414, MS-

7610, Sacramento, CA , 95899-7414, (916) 327-5106 or www.cdph.ca.gov/rhb

Career Opportunities in Radiologic Technology

This degree is a Career and Technical Education (CTE) program which prepares students for both State licensure and national certification in radiography which is necessary for employment in x-ray technology.

Principles of Fluoroscopy Job Skills Certificate

Program Learning Outcomes

Upon successful completion, the student will

- employ appropriate radiation protection practices for patients and themselves.
- competently perform radiographic positioning

This certificate provides fluoroscopy skills for students completing the Associate in Science Radiologic Technology program. The certificate is required as proof of completion to meet the regulations specified by the California Code of Regulations (CCR), Title 17:Public Health, Article 8: Additional School Requirements and Record Keeping, Section. 30437. Upon successful completion of the following courses with at least a “C” grade in each course, the student will be awarded a Principles of Fluoroscopy Job Skills Certificate. The certificate is part of the Career and Technical Education program which prepares students for State licensure which is necessary for employment in the field of x-ray technology.

- Demonstrate an understanding of and an ability to describe the contributions and perspectives of women, ethnic and other minorities, and Western and non-Western peoples.

Associate in Arts in Sociology for Transfer

Effective Fall 2009 all courses used for meeting the requirements for degrees must be completed with a grade of “C” or better.

The Associate in Arts in Sociology for Transfer is intended for those transfer-directed students who plan to complete an AA in Sociology because it guarantees admission to the CSU system (but not to a particular campus or major). In order to earn the Associate in Arts in Sociology for Transfer, students must complete a minimum of 60 required semester units of CSU-transferable coursework which includes the CSU General Education or IGETC requirements with a minimum GPA of 2.0. Students transferring to a CSU campus that does accept the Associate in Arts in Sociology for Transfer will be required to complete no more than 60 units after transfer to earn a bachelor’s degree (unless the major is a designated “high-unit” major). This degree may not be the best option for students intending to transfer to a particular CSU campus or to university or college that is not part of the CSU system. Students should consult with a counselor when planning to complete the degree for more information on university admission and transfer

Principles of Venipuncture Job Skills Certificate

Program Learning Outcomes

Upon successful completion, the student will

- Demonstrate competency by successfully performing venipuncture techniques on humans in the laboratory setting.

The purpose of this certificate is for successful completion of the Principles of Venipuncture course taught at Bakersfield College. The venipuncture regulations and requirements are part of the Health and Safety Code of California, Section 106985. The certificate is necessary for job readiness and to indicate competency for the performance of venipunctures at the job site. The State of California code requires a certificate to indicate proficiency. The certificate is part of the Career and Technical Education program which prepares students for employment in medical

requirements. No additional graduation requirements are required to complete this degree.

Sociology is the study of groups, institutions, social relationships, and social problems in contemporary society. The sociology major prepares the student for careers in law, social work, human services, urban development, law enforcement agencies, public service, counseling, mental health, teaching, and community service. Students will be prepared for a baccalaureate degree in Sociology or a similar degree.

Program Learning Outcomes

Upon successful completion, the student will

- Demonstrate the ability to use and recognize specific language elements in the use of a language.
- Demonstrate an understanding of, and an ability to describe, the ways in which foreign languages reflect historical and cultural contexts.
- Transmit a comprehensive knowledge of the cultural heritage being studied.

- Differentiate and analyze an understanding of the diversity of human expression.

Spanish Associate in Arts Degree

Effective Fall 2009 all courses used for meeting the requirements for degrees must be completed with a grade of “C” or better.

The major of Spanish provides a linguistic and grammatical study of the language and an in-depth look into the culture of Spanish-speaking peoples. The objective of the program is to prepare students for transfer to a four-year university. Employment opportunities are numerous, and include both academic and non-academic positions, including working for corporations, business entities, and not-for-profits. Numerous career pathways are open to students demonstrating a proficiency in spoken and written Spanish including, but not limited to, teaching, social service, and retail.

WELDING

Program Learning Outcomes

Upon successful completion, the student will

- demonstrate proficiency in technical skills and safety principles required for employment in the welding industry.
- demonstrate problem solving skills used in product design and development in the welding industry.
- demonstrate a deep understanding of the core material required for certification in the welding program.

Blueprint Reading and Layout for Welders Job Skills Certificate

This certificate covers the principles of blueprint reading as it applies to welders. Emphasis is placed on the ability to visualize and interpret working drawings. Welding symbols and basic shop math are included. Layout techniques including mathematical and pipe fitting technology are covered. Career opportunities include blueprint reading and layout in the welding industry.

Upon completion of the following courses with at least a "C" grade in each course, the student will be awarded a Blueprint Reading and Layout for Welders Job Skills Certificate.

Total Units: 6

Required Courses:

Course Number	Title	Units
WELD B54a	Blueprint Reading for Welders and Machinists	3.0
WELD B54b	Template Development and Layout for the Welder	3.0

Gas Metal Arc/Gas Tungsten Arc Welding/Flux Core Arc Welding Job Skills Certificate

This certificate emphasizes welding processes of gas metal arc welding (GMAW), gas tungsten arc welding (GTAW)

and flux core arc welding (FCAW). Theory and application as well as safety of these applications while welding on mild steel, aluminum and stainless steel are emphasized. Career opportunities include welder.

Upon completion of the following courses with at least a "C" grade in each course, the student will be awarded a Gas Metal Arc/Gas Tungsten/Flux Core Arc Welding Job Skills Certificate.

Total Units: 10

Required Courses:

Course Number	Title	Units
WELD B1a	Introduction to Oxygen Acetylene Welding and Cutting	2.0
WELD B1b	Introduction to the Welding Processes	2.0
WELD B53ab	Shielded Metal Arc Welding	4.0
WELD B74a	Introduction to GMAW & FCAW	2.0

Shielded Metal Arc Welding Job Skills Certificate

This certificate emphasizes welding processes from oxy-acetylene cutting and brazing through shielded metal arc welding using many different welding electrodes and all positions. Blueprint reading and pattern layouts for welding are highlighted. Career opportunities include entry level welding jobs requiring the use of the SMAW process, blueprint reading, and layout.

Upon completion of the following courses with at least a "C" grade in each course, the student will be awarded a Shielded Metal Arc Welding Job Skills Certificate.

Total Units: 14

Required Courses:

Course Number	Title	Units
WELD B1a &	Introduction to Oxygen Acetylene Welding and Cutting	2.0
WELD B1b &	Introduction to the Welding Processes	2.0
WELD B53ab &	Shielded Metal Arc Welding	4.0
WELD B54a &	Blueprint Reading for Welders and Machinists	3.0
WELD B54b	Template Development and Layout for the Welder	3.0

Welding Certificate of Achievement

Students must comply with the requirements as shown in the catalog under certificate requirements. Students should seek the advice of a welding instructor, counselor or advisor for assistance in planning for a welding Certificate of Achievement. Career Opportunities include jobs requiring the ability to weld in multiple processes, to interpret and create blueprints, to perform layout operations, and to perform basic machining tasks.

Total Units: 32.0

Required Courses:

Course Number	Title	Units
WELD B1a	Introduction to Oxygen Acetylene Welding and Cutting	2.0

WELD B1b	Introduction to the Welding Processes	2.0
WELD B53ab	Shielded Metal Arc Welding	4.0
WELD B55ab	Structural Plate Certification	4.0

INDT B10 or Equivalent	Occupational Readiness	3.0

Industrial Technology, Welding Option Associate in Science Degree

Students must comply with the requirements as shown in the catalog under graduation requirements. Students should seek the advice of a welding instructor, counselor or advisor for assistance in planning for a Associate degree. Career opportunities include jobs requiring skills in welding and layout.
Total Units: 39-40

WOODWORKING/CABINETMAKING Program Learning Outcomes

- Upon successful completion, the student will
- demonstrate proficiency in technical skills and safety principles required for employment in the woodworking/cabinetmaking industry.
 - demonstrate problem solving skills used in product design and development in the woodworking industry.
 - demonstrate a deep understanding of the core material required for certification in the woodworking program.

Woodworking/Cabinetmaking Job Skills Certificate

This certificate covers the principles of woodworking to include materials, hand tools, wood cutting machinery and wood finishing. Emphasis will be put on designs to include modular construction, new materials and processes.

Advanced bidding techniques are discussed.

Upon completion of the following courses with at least a "C" grade in each course, the student will be awarded a Woodworking/Cabinetmaking Job Skills Certificate.
