**Short answer**
Items listed are the one mentioned more than a few times.

6. If you think you would benefit from new technology, please explain: <repeated answers of 75 total responses only> need for increase wi-fi coverage; replace TVs in classrooms with projectors; need for new, faster equipment; doc cameras in all classrooms; some prefer Blackboard over Moodle (no comments favoring Moodle).
7. If you think BC as a whole would benefit from new technology, please explain: <repeated answers of 48 total responses only> technology in every classroom with computer + projector; not satisfied with Moodle; need to update computer hardware.
8. If you have another concern about BC technology, please explain: <repeated answers of 50 total responses only> more current faster technology; hardware problems due to age of equipment; IT doing the best it can with limited staff BUT limited staff negatively impacts the service that should be provided;
